### What are the maximum parcel weights and dimensions?

Permitted parcel weights & dimensions:

Maximum parcel dimensions:  $L = 150 \text{ cm}$ ,  $L + H (x2) + W (x2) = 300 \text{ cm}$  (unfolded).

Package > 32 Kg: surcharge: 50€

Package > 40 Kg: surcharge: 60€

Package > 150 cm: surcharge: 60€

### **Key figures of Bpost:**

- 1250 post offices
- 4.7 million households served 5 days a week
- 27 European countries covered
- 126,000 parcels handled every day

### **Domestic parcels**

Three customer segments are important for bpost: B2C, the delivery of goods from companies such as e-tailers to consumers, the B2B for shipments between companies such as spare parts shipments or shop replenishment and finally, the C2C parcels that consumers send between them for gifts or when they sell goods over internet marketplaces.

### **C2C**

In C2C, bpost focuses on increasing convenience for clients sending and receiving parcels through e-commerce activities.

In addition to various prepaid parcel products, we also offer an online tool for senders to directly pay and print their parcel label. The shipment is managed online, at a very competitive price.
